Investigation Summary

Attack Type: SSH Brute Force

Attacker IP: 198.51.100.23

Compromised Accounts:

- backup
- sysupdate

Remote Server: 192.0.2.99

Evidence:

- 48 Failed SSH Login Attempts
- 2 Successful SSH Logins
- 3 Malicious curl Executions
- Archive Created (/tmp/.cache_bkp.tar.gz)

Conclusion: The attacker successfully brute-forced SSH credentials, compromised the backup and sysupdate accounts, executed a malicious remote script, and created an archive for possible data exfiltration.

Recommended Remediation

- Block attacker IP (198.51.100.23) at the firewall.
- Reset passwords for compromised accounts.
- Disable SSH password authentication.
- Enable SSH key-based authentication.
- Investigate communication with 192.0.2.99.
- Review `/tmp/.cache_bkp.tar.gz` for sensitive data.
